Attorney Docket No. 200207102-1

## IN THE CLAIMS:

A status of all the claims of the present Application is presented below:

1. (Currently amended) An audio/video (A/V) component networking system, comprising:

a centralized storage system adapted to communicatively receive a plurality of source components, each source component adapted to provide A/V program data; and

a sink component <u>disposed remote from the storage system and</u> communicatively disposed between the storage system and a presentation device, the sink component adapted to receive A/V program data from at least one of the plurality of source components and transmit the A/V program data to the presentation device, the sink component adapted to enable a user to select an A/V menu <u>interface data stream</u> associated with at least one of the plurality of source components for display on the presentation device, <u>and wherein the sink component is configured to control streaming of the selected A/V menu interface from the corresponding source component to the presentation device.</u>

- 2. (Original) The system of Claim 1, wherein the sink component is adapted to decode the A/V program data.
- 3. (Original) The system of Claim 1, wherein the sink component is adapted to transmit the A/V program data to the presentation device in real-time.
- 4. (Original) The system of Claim 1, wherein at least one of the source components is selected from the group consisting of a satellite receiver source component, a digital versatile disk (DVD) source component, a compact disc (CD) source component, a computer, and a cable source component.
- 5. (Original) The system of Claim 1, wherein the sink component is adapted to perform a registration operation to register the storage system with the sink component.
